

1. Turn on your Apple IOS device (iPhone, iPod or iPad), open the Settings application, now find and tap on Mail, Contacts, Calendars >

Go to **Add Account...** and then select Other.

2. Tap Add Mail Account.

3. Now fill out the details - Your Name, Full Email Address, Password and then Description (this can be anything you want).

Cancel      **New Account**      Next

**Name**      Your Name

**Email**      youraddress@scorch.co.nz

**Password**      ●●●●●●●●●●●●

**Description**      scorch.co.nz

4. On the next screen select POP

Cancel      **New Account**      Save

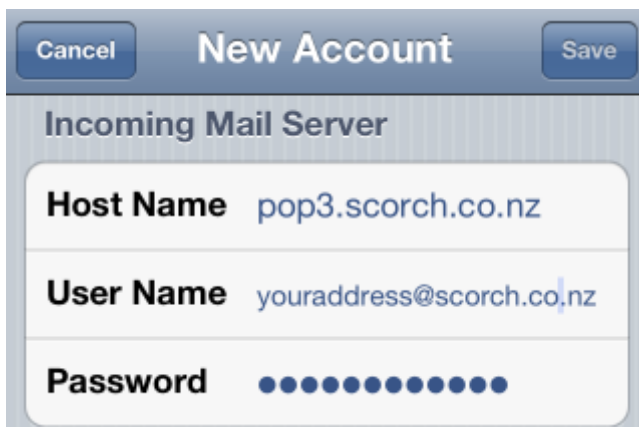

IMAP      **POP**

**Name**      Your Name

**Email**      youraddress@scorch.co.nz

**Description**      scorch.co.nz

5. Under Incoming Mail Server enter the Host Name is **pop3.scorch.co.nz**. Also confirm the User Name (Full Email address) and Password.

Cancel      **New Account**      Save

**Incoming Mail Server**

**Host Name**      pop3.scorch.co.nz

**User Name**      youraddress@scorch.co.nz

**Password**      ●●●●●●●●●●●●

6. Under Outgoing Mail Server enter the Host Name is **smtp.scorch.co.nz**. Also enter the User Name (Full Email address) and Password.

Now tap Save.

7. This saving process can take some time so try to be patient. It will eventually come up with the warning message below, simply tap Yes to continue without SSL for the first prompt.

It may come up with an error saying "SMTP Server does not support authentication" or similar. Simply tap OK and continue below.

8. Eventually the device will come back with all ticks and take you back to the Mail, Contacts, Calendars page.

9. All done! Go back to the Home screen and open the Mail application, you should now receive your email.

The iPhone, iPad and iPod Touch are virtually identical software wise so this guide should apply to all devices.

Please note that Scorch cannot support the IOS device or software itself - we can simply offer guidance in setting up your Scorch email address.
